Choosing Your Absorbents

Having the right absorbent for the job makes a big difference. Proper product selection can make your employee's jobs easier, create a safer work environment, and even save you money! These three easy steps will help you find the correct SPC absorbent product for your application.

1 STEP ONE: KNOW WHAT YOU'RE ABSORBING

Your Spill:

- Hydraulic oil
- Motor oil
- Brake fluid
- Cooking oil
- Turpentine
- And other oil-based fluids

Your Absorbent Solution:

Oil Only Absorbents

These absorbents are specialised for oil and other petroleum-based spills including paints and other non-water soluble chemicals. These absorbents will not absorb water and will float indefinitely.

Page 10

Your Spill:

- Coolants
- Solvents
- Gasoline
- Vegetable oil
- Kerosene
- And other water-based fluids

Your Absorbent Solution:

Universal Absorbents

All-purpose products that clean-up oils, coolants, solvents and water-based fluids anywhere in your facility. Use around machinery, under leaky pipes, in messy traffic areas or for general maintenance projects.

Page 22

Your Spill:

- Aggressive chemicals
- Citric acid
- Sodium hydroxide
- And other unknown chemicals

Your Absorbent Solution:

Chemical Absorbents

Surfactant-treated polypropylene absorbents can be used on a wide range of chemicals, including hydrofluoric acid, and are chemically inert, so they will not react with aggressive fluids.

Page 28

Your Spill:

- Cutting fluids
- Gasoline
- Coolants
- Non-aggressive chemicals
- And other water-based fluids

Your Absorbent Solution:

Re-Form™ Eco-Friendly Absorbents

These all-purpose absorbents are made from a minimum of 80% recycled material. The Re-Form™ products are green to produce and green to use, and are up to 50% more absorbent than polypropylene absorbents. They also meet NFPA Class A Fire Retardancy (Universal products).

2 STEP TWO: IDENTIFY YOUR ABSORBENT APPLICATION

Wiping, Drips or Foot Traffic Applications

Pads & Rolls

Use for wiping or placing under drips and leaks. Pads are pre-cut absorbents, while rolls allow you to choose the length you need.

SOCs & Pillows

For use around equipment or placing under drips.

Barrier-backed or Heavy Traffic Applications

Mats & Rugs

For use with heavy foot or vehicle traffic, or where a barrier-backed mat is needed.

Emergency Spill Response

Spill Containment and Spill Kits

Be prepared for emergency spills with a variety of products already bundled together - so you can be confident you have the products you need to contain unexpected spills. Additional spill control available through the use of spill pallets and absorbent storage centres.

3 STEP THREE: SELECT YOUR ABSORBENT SIZE AND WEIGHT

Now that you know what you're absorbing, and what style of product you need, you can choose your absorbent from the many sizes and absorbency weights that Brady SPC offers.

Choosing Your Absorbents

THINK YOU'RE ALREADY USING THE CORRECT ABSORBENT? PUT IT TO THE TEST!

Want to know if your absorbent is working for you? Start at the end, in the rubbish bin. One of the best ways to pick the right absorbent is to see what it looks like when you're done with it. Take a look.

Check Product Type

Looks like this absorbent roll is being used to contain a leak – instead consider using a SOC for containing leaky equipment. Brady offers SPC pads, rolls, SOCs, pillows and more so that you have the right type of product to contain your spill.

Check Durability

Are your absorbents falling apart or tearing due to heavy traffic? Choose a tough absorbent for tough jobs so that you can take advantage of the full absorbent potential without your absorbent falling apart.

Under-saturated

Check Absorbency

Are your absorbents being used to their absorbency capacity? Or maybe your current absorbent isn't absorbing the whole spill. For small spills, choose a medium or light weight pad to avoid wasting absorbents.

For large spills, use a heavy weight pad to cut down on the number of lighter pads you go through.

Over-saturated

WHY SPC PRODUCTS?

For more than 30 years, SPC products have helped customers protect against leaks, drips and spills that create safety hazards in the workplace. Brady provides high-quality service, application expertise and product knowledge to SPC distributors and customers.

Brady SPC has a history of innovation and continues to develop industry-leading products and applications. Brady provides on-going lean initiatives to help offset raw material increases to keep costs stable and maintain maximum cost savings for our customers.

Brady SPC - An Environmentally Friendly Company

As a socially responsible company, Brady SPC continually strives to reduce waste by reusing 97% of materials. In working to sustain unused materials, Brady SPC replenishes all wasted raw materials and reduces the amount of materials sent to landfills. Brady SPC's ultimate goal is to eliminate waste, conserve energy, recover resources and continue to work towards a zero waste facility.

WHY IS SPILL CONTROL IMPORTANT?

Beyond the obvious need to protect our environment and to reuse or recycle as often as we can, a proper spill control programme can create a safe and productive work environment for your employees.

By complying with EPA and OSHA regulations around spill control we provide our people with conditions that allow for the greatest productivity and the least amount of down time for our facilities. The cost of non-compliance around this area of regulation can be devastating to any business.

Spill Prevention Control & Countermeasure (SPCC) Plan

In the United States, the EPA issued its final rule amending the SPCC under the authority of the Federal Water Pollution Control Act. This regulation became effective as of August 16, 2002.

What is an SPCC Plan?

An SPCC Plan is a facility-specific comprehensive description of a facility's containment and counter measures that would prevent an oil spill from occurring as well as procedures to respond and clean-up an oil spill that does occur.

The SPCC plan addresses the following three areas:

- Operating procedures that prevent oil spills
- Control measures installed to prevent a spill from reaching the environment
- Countermeasures to contain, clean-up and mitigate the effects of an oil spill that reaches the environment

Regulations (USA)

The following OSHA and EPA regulations protect your employees and the environment;

29 CFR 1910.22(a)(2)

Clean, dry workplace floors.

40 CFR 112.7(c)(1)(vii)

Absorbent materials are one option for preventing oil spills from reaching waterways.

29 CFR 1910.120(j)(1)(vii)

DOT-specified containers and suitable quantities of absorbents shall be kept available for response to spills.

Benefits From Meltblown Polypropylene

HOW MELTBLOWN POLYPROPYLENE SORBENTS CAN HELP YOU TO REDUCE COSTS...

75% of (industrial) companies are still using granular to clean up spills and leaks because they don't have or know an alternative, or because they believe that granular is the cheapest solution. At first glance, this may be true but the cost comparison below will show that meltblown polypropylene sorbents are a less costly alternative even though the initial purchase price may be higher.

| The cost for cleaning up a spill of 200 litres of oil. | | |
|--|--|---|
| | Granular | Sorbent Pads |
| Material (kg) | 200 kg (1 kg of granular absorbs 1 litre of oil) | 10 kg (1 kg of pads absorbs 20 litres of oil) |
| Price per kg (€/kg) | 1 €/kg | 15 €/kg |
| Total waste (kg) | 400 kg (200 ltr oil + 200 kg granular) | 210 kg (200 ltr oil + 10 kg pads) |
| Disposal cost per kg (€/kg) | 0.5 €/kg | 0.5 €/kg |
| TOTAL COST | 400 € (200 € + 200 €) | 255 € (150 € + 105 €) |

i This is a basic analysis using estimations and averages. Savings would be even higher if labour cost was included in this calculation.

REDUCE COSTS • INCREASE PRODUCTIVITY • IMPROVE SAFETY

More and more industries are using Meltblown Polypropylene (MBPP) sorbents for the control and clean up of oils, industrial liquids and chemicals in their workplace. See for yourself why MBPP sorbents are the product of choice!

| GRANULES | MBPP SORBENTS |
|--|--|
| 1  LOW ABSORPTION Once or twice its weight. |  ABSORBS 10 - 25 times ITS WEIGHT so you use less material... saves money for the overall lowest cost of ownership. |
| 2  SLOW ABSORPTION hours vs. seconds. |  ABSORBS QUICKLY... seconds vs. hours so spills are cleaned up quickly. |
| 3  MESSY & more difficult to use. |  SIMPLE – use like a giant paper towel! |
| 4  HIGH DISPOSAL COSTS due to volume needed. |  LOWER DISPOSAL COSTS due to less product needed. Also, environmentally responsible as it incinerates to .02% ash. |
| 5  DIFFICULT & labour intensive to clean up. |  EASY pick-up and disposal, saving time and money. |
| 6  Small particles enter and DAMAGE MACHINERY or your finished product. This is why more and more industries are banning the use of granules in their facilities. |  MACHINE FRIENDLY. No risk of loose fibres getting into machines or damaging your finished product. |
| 7  LIMITED chemical resistance. |  WIDE CHEMICAL RESISTANCE. MBPP will not react with aggressive chemicals for greater safety. |
| 8  POTENTIAL HEALTH HAZARDS. (i.e. if silica based) |  SAFE – no potential health risk of inhaled dust particles. |

As a user of sorbents, you know where at least 75% of your leaks, drips and spills may occur. By using MBPP sorbents, you can easily place sorbents under these risk zones - something that is definitely too messy to do with granules.

THINK SMART ... WORK SMART

Oil Only

Absorbs Oil and Repels Water

Oil Only Absorbency

Specialised for oil and other petroleum-based spills, oil only pads and rolls will not absorb water and will float indefinitely. These absorbents are unaffected by temperature and impervious to rot and mildew. Ideal for outside use, Brady's oil only SPC products are equally effective in soaking up petroleum-based solvents and paints, vegetable oils and other non water soluble oil-based fluids.

The Technology

The technology (construction layers, weave and loft) behind each of the oil only products helps determine the strength and absorbency of each absorbent. This information along with the product's characteristics are what helps you decide which absorbent is best for your application.

Common Liquids Absorbed:

- Drilling and cutting fluids
- Hydraulic and brake fluids
- Engine oils
- Transmission fluids
- Lubricants
- Gasoline, diesel and aircraft fuels
- Cooking oils
- Oil-based paints and solvents
- And other oils and petroleum-based fluids

OIL ONLY ABSORBENT FAMILY:

All of these pads and rolls start with a highly absorbent polypropylene core - the difference is what happens from there. Features such as durability, absorbency grades and spunbound give you versatile absorbent options for your specific application.

Marine

High Absorbency On The Water

Marine

SPC marine specialty absorbents are designed to float on water and contain or absorb a wide variety of marine fuels and oils. From containment to booming and skimming operations, these absorbents will soak up unwanted fluids on lakes, rivers, streams and coastal shorelines. Marine absorbent products are made for high absorbency and rapid deployment in demanding emergency situations.

The Technology:

SPC absorbent booms are constructed of highly absorbent polypropylene fibres encased in a durable skin that is lined with a heavy duty tow rope. The booms are fastened with three stainless steel connectors on each end to link booms together for fast retrieval. This is extremely important when towing heavy booms are saturated with oil.

i Increase Safety and Save: Colour Coded Waste Stream

Save on disposal costs by using different coloured absorbents in specific parts of you facility and throughout your waste streams.

For example: a facility might use yellow absorbents in radioactive areas and green absorbents in their chlorine areas. Then the facility would use grey universal absorbents for the rest of their facility. A colour coded system benefits your employees' understanding of the waste stream because they will assume yellow absorbents are saturated with radioactive waste and green absorbents are saturated with chlorine.

Mats & Rugs

Clean, Dry Floors Prevent Slips, Trips & Falls

Mats & Rugs

SPC absorbent mats and rugs keep aisles and walkways slip-free by absorbing and containing oils, liquids or other spills. They are designed to hold up in your toughest applications and are ideal for high traffic areas and workstations. Compared to an entrance mat, absorbent mats and rugs offer better traction, reduce slipperiness and keep liquids from being tracked from one area to the next.

The Technology

SPC absorbent mats and rugs are constructed from durable, needle punched, polypropylene fibres - a more durable manufacturing process with a larger fibre diameter than meltblown fibres. This technology means that fibres or absorbent materials will not come loose around high traffic areas or workstations.

Common Liquids Absorbed:

- Bases
- Oils
- Chemicals
- Solvents
- Water-based fluids

MATS & RUGS ABSORBENT FAMILY:

All of these mats and rugs start with a highly absorbent core - the difference is what happens from there. Features such as durability, absorbency grades and construction give you versatile absorbent options for your specific application. Use the table below to help you choose the appropriate mat or rug for your applications.

Regulations were set for oil tankers, vessels, oil tanker owners and operators improving their ability to prevent and respond to oil spills.
